

COMPLETE BIRD NUTRITION

Extruded pellets, supplements, hand feeding formulas, bedding & more.

with over 10%
fruits, berries,
vegetables and
herbs

Dear bird friend & breeder,

We are proud that you have chosen our premium products from **YOUR PARROT**. Our unique recipes are successfully used worldwide by veterinarians, zoos, and breeding stations. We care deeply about the well-being of your exotic birds, which is why we don't use synthetic additives in our feed and rely solely on the power of various fruits, berries, herbs, and vegetables.

Now, through many years of research (in the wild & in captivity), we have the ability to produce extruded pellets, hand feeding formulas, nectars and supplements that resemble the original diet of many parrots, parakeets, softbills and fruit pigeons in their habitat.

Whether macaw or zebra finch, one thing connects us all and this is probably the most beautiful hobby in the world — aviculture. Everyone is constantly striving to optimize the husbandry and diet of their birds in such a way that breeding pairs remain vital for a long time or the most faithful companion shows a magnificently shiny plumage. Ultimately, it's about the well-being of our wild exotic birds and that's exactly what my mission is at our family company.

Vital Pellets

SIMPLY FEED CLEVER!

Our Vital Pellets are enriched with over 10% fruits, vegetables, herbs and berries. The range is very popular among breeders, bird keepers, and zoos in over 40 countries. No synthetic preservatives or colorants. No added sugar. Loaded with amino acids, spirulina and healthy added probiotics. This diet is made for 365 days a year including the breeding season.

Let's compare

What makes us unique?

Conventional pellets

Often synthetic colorants, added sugars (fructose), preservatives

Often fruit flavors and fruit oils

Often lacking amino acids, lower levels of essential vitamins & minerals (cost)

Often opaque foreign large corporations, lack of consultation, profit-oriented product formulations

Vital Pellets - Your Parrot

No colorants, no chemical preservatives, no added sugars

With real fruits, berries, vegetables & herbs

With higher levels of vitamins, minerals, and amino acids. Contains probiotic bacteria

Transparent production, personalized customer service, daily videos, posts, and more on Social Media @dein_papagei

Benefits at a glance.

VITAL PELLETS VS SEED MIXTURES

Vital Pellets from Your Parrot

Scientifically formulated to ensure a balanced diet with proteins, fats, amino acids, vitamins, and minerals. Tested free from mold.

Pellets significantly reduce waste in aviaries as they are 100% consumed. Less waste means less cleaning, cost-effective, and sustainable feeding.

Balanced amino acids (the building blocks of proteins) enable optimal development of feathers and the immune system. Enriched fruits, berries & herbs support the bird's organism consistently on a daily base.

Breeding birds yield much better results. Egg fertilization rates are significantly higher, and chicks are more vital and robust in their development. Added Probiotic bacteria can support digestion.

Standard Seed Mixtures

There are no detailed analyses of the ingredients. Grains vary widely in nutrients and quality. They can be contaminated with mold and pests.

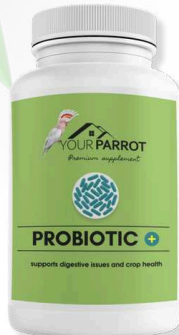

Seed mixes often contain 'filler seeds'. These seeds are cheap but not eaten by the bird - e.g. crushed corn. Birds shell seeds. These husks & filler seeds make up to 60% of a mixture, ending up only on the cage floor attracting mice!

Most seeds are deficient in essential amino acids like lysine, methionine, valine, threonine, and tryptophan. Amino acid deficiency leads to poor feathering, low vitality, and increased risk of disease.

Breeding birds fed on seed mixes often struggle to produce sufficient calcium and vitamin D3 for growing chicks. Unfertilized eggs, egg binding, and weak offspring are the consequences.

Premium Supplements

NATURES BOOST WITH EFFECTIVE INGREDIENTS

General Health

Breeding Results

Feather Colour

Animal Proteins

THE VALUABLE AND IMPORTANT SUPPLEMENT
FOR ALL BIRDS

Animal protein in the form of our premium egg feed from YOUR PARROT plays a crucial role in the diet of various parrot species due to its comprehensive nutrient profile. A superb feed for the breeding season and provides extra nutrition and support for weak birds, aiding them to recover and regain strength.

Tested Quality

OUR PRODUCTS ARE REGULARLY TESTED FOR MYCOTOXINS, FUNGUS, VITAMINS, MINERALS, AND NUTRITIONAL REQUIREMENTS.

Passionate about it.

 YOUR PARROT

The founder Franz Dahlheim is breeding exotic birds already 19 years. He simply wanted to offer a more natural and effective feed. It took almost three years to develop the right recipe that would forever change the feeding of exotic pet birds.

Hand feeding

NO ADDED SUGAR, NO BAKERY PRODUCTS

from
day one

Super Fat

The variant for special species: Hyacinth Macaw, Palm Cockatoo, Military Macaw, Golden Conure, Green-winged Macaw, Palm Cockatoo

Pro Energy

The variant with higher fat content. For African Grey Parrots, Blue & Gold Macaw, Caiques

Protein Boost

An all-rounder in raising your chicks. For Amazons, Parakeets, Galah's, Cockatiels, Lovebirds, Budgerigars

Hand-feeding formulas made from the finest ingredients, including papaya, carrots, and other fruits, berries, vegetables, and high-quality oils. Packaging: Resealable buckets in 1.5 kg, 3 kg, 6 kg.

Breeder Success

A FORMULA YOU CAN RELY ON

Ara Ararauna raised on the Pro Energy Hand Feeding Formula

Eolophus roseicapilla & Sun Conures raised on the Protein Boost Formula

Nestor notabilis raised on the Protein Boost Formula

A flock of Anodorhynchus hyacinthinus raised on the Super Fat Formula

Syringe Set + Soft Crop Tubes

RE-USABLE TUBES FOR LONG-LASTING USE

Key features:

- double exit holes ensure a soft and even release of the hand feeding formula
- easy to clean, long-lasting materials ensure durability
- simple to use, making feeding stress-free for both you and your parrot

Each set includes five high-quality syringes from Germany, paired with flexible crop tubes for a gentle feeding.

Tropical Mixed Oil

FIVE DIFFERENT NUTS IN ONE OIL

For African Grey Parrots,
Macaws, Black Cockatoos,
Caiques, Golden Conures
and many more...

Our mixed nut oil is the result of a selective manufacturing process, where a specific blend of oils from macadamia nuts, brazil nuts, almonds, peanuts, and coconuts is used. The unique composition of these diverse oils is designed to provide optimal intake of various essential fatty acids to your parrots.

Tasty for every bird!

Lori Nectar & Dry

FOR ALL BRUSH TONGUES

Exclusive formulated Lori Nectar with additional spirulina for a green surprise. Added fruits & fresh pollen make the products outstanding on the market. Available in 1,5kg, 3k and 7kg buckets.
