- Vibrant feathers
- Digestive care
- Breeding success

Dear bird friend & breeder,

New Supplements for Happy, Healthy Birds!

We're excited to share our new bird supplements – made to help your birds thrive! Just like our trusted bird foods loved by vets, zoos, and breeders worldwide.

We spent years studying birds in the wild and in aviaries to make these supplements working out effectively. Whether you have a big parrot or a tiny finch, they're designed to match what birds naturally need.

At Your Parrot we truly care about birds. Our goal? To help you give your feathered friends the best life possible – whether they're raising chicks or just being your colorful buddy. Let's keep our birds healthy and happy, together!

Check out the full range in the brochure below.

Why Vitamins Are Essential for Your Bird's Health

Birds rely on vitamins to thrive—just like humans! These tiny nutrients play a huge role in energy production, immunity, feather quality, and even breeding success. However, birds on seed-based diets often face deficiencies, as seeds lack essential vitamins and minerals. Even high-quality seed mixes can't provide the full spectrum of nutrients birds need for optimal health.

Water-Soluble Vitamins (must be replenished daily):

- B-Complex: Vital for metabolism, nerve function, feather growth.
- Vitamin C: Boosts immunity and aids in healing.

Fat-Soluble Vitamins (stored in the body):

- Vitamin A: Crucial for vision, skin, and respiratory health.
- Vitamin D3: Ensures strong bones and calcium absorption.
- Vitamin E: Protects cells and supports muscle function.
- Vitamin K: Key for blood clotting and wound healing.

The Seed Dilemma

Seeds are high in fat and low in vitamins. Over time, a seed-only diet leads to deficiencies, causing issues like poor feather quality, weakened immunity, and even organ damage.

Our Solution:

YOUR PARROT Supplements fill these gaps! Formulated with balanced, bioavailable vitamins and minerals, they transform your bird's diet from "surviving" to thriving. Pair them with fresh veggies, vital pellets, and our products like **YOUR PARROT Probiotic + or B-Complex** for a complete nutritional plan.

Calci Power

FOR STRONG EGG SHELLS AND BONES

**supports strong egg
shells**

**maintains bone
strength**

**reducing risk of
muscle cramps**

Available in 500g

YOUR PARROT Calci Power is a specially formulated supplement designed to support avian health, particularly during critical phases like breeding. It combines calcium and magnesium with high-grade B vitamins to address key nutritional needs.

Key Benefits:

- **Optimal Absorption:** The calcium and magnesium in this formula are easily absorbed, making them ideal for preventing deficiencies and promoting strong eggshell development.
- **Balanced Breeding:** By pairing calcium with magnesium, the supplement helps maintain proper mineral balance, reducing risks like muscle cramps or bone weakness in breeding females.
- **Nervous System Support:** Added B vitamins contribute to calm, healthy birds by supporting nerve function, ensuring smoother breeding cycles.

Why Calcium Matters:

Calcium is essential for bone strength, muscle function, and creating sturdy eggshells. During breeding, females require extra calcium to avoid depleting their own bone reserves, which can lead to long-term health issues. Weak or thin eggshells may also harm developing chicks, as they rely on the shell's calcium in early growth stages.

YOUR PARROT Calci Power provides a reliable solution to meet these increased demands, safeguarding both parent birds and their offspring. Perfect for breeders and pet bird owners.

Why Minerals Matter – And Why Seeds Aren't Enough

Minerals are essential for your bird's bones, feathers, nerves, reproduction, and overall vitality. Yet one of the biggest hidden problems in bird care today is the mineral deficiency caused by seed-based diets.

While seeds may seem natural, they're severely lacking in key minerals like calcium, magnesium, zinc, iron, selenium, and iodine. Birds eating mostly seeds get very poor access to these vital nutrients – leading to weak bones, poor fertility, feather issues, and low immunity.

In the wild, birds instinctively balance their diet by consuming plants, mineral-rich bark, clay, and soil. These natural sources provide a wide spectrum of bioavailable minerals that are almost completely missing from seeds.

That's why mineral supplementation is not optional – it's essential. Especially for breeding birds, growing chicks, or during molting and stress phases.

Support nature's balance. Add minerals back into your bird's diet – for strength, shine, and health with YOUR PARROT - Supplements

Protein Pro 50

50% PURE PROTEIN BOOST

**ultimate breeding
support**

**high protein
source**

**energy
boost**

Available in 500g

YOUR PARROT Protein Pro 50 is a premium slow-roasted supplement engineered to meet the intense nutritional demands of breeding birds. Combining high-value protein, balanced amino acids, and essential unsaturated fatty acids, it optimizes muscle development, energy, and reproductive success.

Key Benefits:

- **Critical Growth Support:** Delivers 50% extra protein via a gentle slow-roasted formula, fueling muscle development in parent birds and healthy growth in chicks.
- **Reproductive Vitality:** Rich in amino acids and essential fatty acids to enhance fertility, egg quality, and chick viability.
- **Sustained Energy Release:** Supports high energy levels throughout demanding breeding cycles, reducing parent fatigue.
- **Optimized Digestibility:** Specially processed for easy absorption, ensuring maximum nutrient uptake when parents and chicks need it most.

Why Protein Matters in Breeding:

YOUR PARROT Protein Pro 50 provides the concentrated, highly digestible protein boost essential for successful breeding outcomes. It bridges the nutritional gap, ensuring parents stay strong and chicks thrive from hatching to fledging. Essential for serious breeders and dedicated pet bird owners.

Breeder Boost

FOR THE BEST BREEDING RESULTS

optimizing
fertility

supports
vitality

essential
nutrients

Available in 500g

YOUR PARROT Breeder Boost is a complete avian supplement designed to fill nutritional gaps and promote long-term health in birds. Packed with essential vitamins, amino acids, minerals, and trace elements, it ensures your birds thrive even when their diet falls short or if the birds are in the breeding time.

Key Benefits:

- **Comprehensive Nutrition:** Addresses hidden vitamin deficiencies that, over time, can weaken immunity and shorten lifespans.
- **Enhanced Metabolism:** Boosts nutrient absorption, helping birds get the most out of their food for better energy and vitality.
- **Stress Support:** Safely adjust dosing during challenging periods like molting, breeding, or environmental changes to maintain optimal health.

Why Breeder Boost Matters:

Up to 90% of bird health issues stem from inadequate nutrition. Vitamins act as the body's "spark plugs," breaking down proteins, carbs, and fats to fuel everything from feather quality to immune function. **YOUR PARROT Breeder Boost** delivers these critical nutrients in a form birds love—simply add it to their daily water or soft food.

- Pair with **YOUR PARROT Calci Power** (minerals) for stronger bones and beak health.
- Combine with **YOUR PARROT Vitamin E** (3 weeks before breeding) to boost fertility and egg viability to a maximum.

B-Complex

FOR A STRONG METABOLISM, FEATHER HEALTH & IMMUNITY

**healthy
metabolism**

**supports nerve
functions**

**keeps
stress low**

Available in 500g

YOUR PARROT B-Complex is a targeted vitamin supplement designed to address B-vitamin deficiencies in birds, supporting nervous system health and optimizing metabolism for proteins, fats, and carbohydrates.

Key Benefits:

- **Corrects Deficiencies:** Combats symptoms like nervous behaviors (e.g., head tilting), hyperactivity, uncoordinated movements, skin issues, and stunted growth.
- **Stress & Recovery Support:** Ideal for birds undergoing stress, illness, or medical treatments (e.g., antibiotics) that deplete B-vitamin levels.
- **Metabolic Boost:** Enhances nutrient processing, energy production, and overall vitality.

Why B Vitamins Matter:

B vitamins are vital for digestion, nerve function, heart health, blood cell formation, and skin integrity. Birds often lack sufficient B vitamins in standard diets, especially during high-demand periods like molting, breeding, or recovery.

- Use **YOUR PARROT B-Complex** only when deficiencies arise (e.g., stress, illness, or medication use).
- Healthy birds without specific needs should stick to **YOUR PARROT Calci Power & YOUR PARROT Probiotic +**

By restoring B-vitamin balance, this supplement helps birds stay calm, resilient, and thriving—no matter life's challenges.

dose to shine
bright.

Probiotic

SUPPORTS DIGESTIVE ISSUES AND CROP HEALTH

**supports digestion &
crop function**

**detox
power**

**accelerate
recovery**

Available in 500g

YOUR PARROT Probiotic + is a probiotic powerhouse designed to keep your birds' digestive systems healthy and resilient. Perfect for all bird species, this supplement combines probiotics, prebiotics, and electrolytes to tackle gut imbalances and boost overall vitality.

Key Benefits:

- **Digestive Support:** Balances crop and intestinal flora, easing issues like diarrhea and speeding recovery after illness or antibiotics.
- **Stress Shield:** Use before travel, shows, or breeding to protect gut health during high-pressure moments.
- **Nutrient Boost:** Enhances food breakdown and nutrient absorption, especially critical for breeding birds.
- **Detox & Defense:** Binds toxins and crowds out harmful bacteria (like Salmonella and E. coli) by promoting beneficial microbes.

How It Works:

The formula includes proven probiotics that oxygenates the gut, produces digestive enzymes, and creates a thriving environment for “good” bacteria. Paired with prebiotics, it ensures optimal digestion and immune function.

Easy to Use:

Just mix with drinking water or soft food. Pair seamlessly with other **YOUR PARROT supplements** for a full wellness routine.

because
health starts
in the crop.

Vitamin E

PROMOTES FERTILITY AND METABOLISM

supports
fertility

maintains
immunity

supports sexual
drive

Available in 500g

YOUR PARROT Vitamin E is a specialized vitamin E supplement tailored for birds, particularly during breeding. Featuring α -Tocopherol— a potent, long-lasting form of vitamin E—it supports critical bodily functions and enhances reproductive outcomes.

Key Benefits:

- **Fertility & Hatchling Health:** Boosts breeding success by improving fertility, embryo survival, and the vigor of newborn birds and reptiles.
- **Cell Protection:** Shields cell membranes from damage and neutralizes harmful toxins to maintain tissue health.
- **Immune & Metabolic Support:** Enhances antibody production, energy metabolism, and overall immunity.
- **Stress Defense:** Vital during heat, cold, parasites, or infections, when vitamin E demands spike.

Why Breeders Trust **YOUR PARROT Vitamin E**:

Vitamin E deficiency can lead to muscle weakness, reduced fertility, and developmental issues in offspring. **YOUR PARROT Vitamin E** fills dietary gaps, ensuring optimal hormone balance, muscle function, and organ health.

power.

FeatherPlex^{RED}

INTENSE RED COLOURING FOR CANARIES

**intense red
feathers**

β

**source of
Beta-Carotene**

**be a winner
at shows**

Available in 500g

Give your bird's vibrant red plumage a radiant boost with **YOUR PARROT FeatherPlex Red**, a specially formulated supplement designed to deepen feather color and promote wellness during molting.

Why Birds Love FeatherPlex red:

- **Color Brilliance:** Lock in rich, vibrant red hues and prevent fading with carotenoids—the same natural pigments used in food-safe dyes.
- **Feather Renewal:** Packed with B-Vitamins, it fuels strong, healthy feather growth, preventing issues like curling or weak plumage.

Usage Tips:

- **When to Use:** Add to drinking water or soft food at the start of molting and continue until feathers fully regrow.
- **Power Pairing:** Maximize results by combining with **YOUR PARROT Probiotic + & YOUR PARROT Breeder Boost**

**born to
be red.**

FeatherPlex^{YELLOW}

INTENSE YELLOW COLOURING FOR CANARIES

**intense yellow
feathers**

B

**source of
Vitamin B**

**be a winner
at shows**

Available in 500g

Give your bird's vibrant yellow plumage a radiant boost with **YOUR PARROT FeatherPlex Yellow**, a specially formulated supplement designed to deepen feather color and promote wellness during molting.

Why Birds Love FeatherPlex red:

- **Color Brilliance:** Lock in rich, vibrant yellow hues and prevent fading
- **Feather Renewal:** Packed with B-Vitamins, it fuels strong, healthy feather growth, preventing issues like curling or weak plumage.

Usage Tips:

- **When to Use:** Add to drinking water or soft food at the start of molting and continue until feathers fully regrow.
- **Power Pairing:** Maximize results by combining with **YOUR PARROT Probiotic + & YOUR PARROT Breeder Boost**
